

Micro Device Master

MicrodeviseMaster also provide microwave filters and other microwave components. in terms of function, low-pass, high-pass, band-pass, and band-reject filters; and in terms of structure, LC, cavity, ceramic, waveguide, tubular, helical, and microstrip filters. Other passive products produced include frequency dividers/combiners, duplexers, multiplexers, and equalizers. Using a full set of imported automatic production equipment, committed to mature technology, stable quality, good service and low prices to customers to improve competitive semiconductor products and services. A large number of spot supply, variety complete, quality assurance, we has a strong engineering team can provide technical support.
